PROFESSIONAL SUMMARY

BCA in Data Science graduate with hands-on experience in Python, Flask, SQL, full stack web development, and machine learning projects. Experience includes co-founding a freelance web development company, backend development, functional testing, and API integration, with practical exposure to data analysis and exploratory visualisation.

EDUCATION

Amrita Vishwa Vidyapeetham

Bachelor of Computer Applications - Data Science

Kochi, Kerala

Mar 2021 - Oct 2024

Relevant Coursework: Data Structures & Algorithms, Database Management Systems, Machine Learning, Software Engineering, Data Mining, Data Analysis

EXPERIENCE

Freelance Back-end / Web Developer

Remote

Collaborative Developer

Nov 2025 - Present

- Collaborated with a small team to develop back-end functionality for web applications used in client projects.
- Debugged and tested web applications to ensure reliable functionality and performance.
- Implemented application logic and assisted with API integration to support front-end features.

Concept Carton LLC

Hybrid

Technical Intern

Jan 2025 - Jul 2025

- Supported development team by performing functional testing and reporting bugs to improve product stability.
- Assisted in updating project documentation and organizing requirements for ongoing software features.
- Observed Agile sprint ceremonies and learned practical use of Git version control workflows.

PROJECTS

Automated Number Plate Recognition System | *Machine Learning, Python, YOLOv8*

- Developed a number plate recognition system using Python and computer vision techniques, achieving 96.8% precision with YOLOv8.
- Compared YOLOv8, SVM, and Random Forest models; built a Flask web app for users to upload images and retrieve recognised plate numbers.

ResumeMatch - AI Resume Analyzer | *Python, Flask, scikit-learn, Groq, Llama 3.3*

- Built a Flask web app that scores resume-to-job-description match using TF-IDF cosine similarity (scikit-learn) and flags missing keywords and ATS readability issues.
- Integrated the Groq API (Llama 3.3 70B) to generate tailored bullet rewrites, with server-side key handling and per-IP rate limiting; deployed on Render.

IPL Cricket Analytics Dashboard | *Python, Streamlit, Pandas, NumPy, Data Visualisation*

- Built an interactive Streamlit dashboard analysing 14 IPL seasons (2010-2023) across 200,000+ deliveries, with live season filters for team trends, player stats, and toss/venue insights.
- Created head-to-head heatmaps and statistical visualisations to surface team dominance, player rankings, and over-phase trends from large-scale cricket data.

Cardly - Thumbnail & Social Image Design Playground | *TypeScript, React, HTML5 Canvas, SVG*

- Built a browser-based playground to design Open Graph images, GitHub repo thumbnails, YouTube covers, and LinkedIn banners with live preview and one-click PNG/SVG export.
- Implemented reusable templates, drag-and-drop layout controls, and client-side rendering pipeline for fast, install-free image creation across multiple social formats.

SKILLS

Technical: Python, Java, SQL, Flask, HTML, CSS, JavaScript, Pandas, NumPy, scikit-learn, Matplotlib, Streamlit, Tableau, Git, REST APIs, Data Analysis, Data Mining

Certifications: Artificial Intelligence, Database & SQL, English CEFR C1, Anthropic AI Fluency, Claude 101

Leadership: Event Organizer, College Model United Nations Club - Coordinated logistics, registrations, and venue arrangements
